Subject Index, Volume 12

All minerals names occurring in titles, subtitles, and abstracts are indexed. Chemical formulae are according to M. Fleischer, Glossary of Mineral Species, 1983 (in some cases simplified) or as given by the author. The numbers refer to the title page.

A

adamite Zn_2AsO_4 (OH)
  cf. olivenite group
agate
  water 300
akaganeite FeOOH
  nuclear gamma ray resonance 176
  transformation to hematite 176
akermanite $Ca_2MgSi_2O_7$
  cf. melilite
albite $NaAlSi_3O_8$
  domain boundary 132
  elastic instability 132
  Landau theory 93
  order disorder 99
  phase transition 93, 99
  strain 132
  thermodynamics 93, 99
  transformation twinning 132
alkali feldspars $(K,Na)AlSi_3O_8$
  electron paramagnetic resonance 324
  infrared spectra 324
  optical absorption spectra 324
  radiation effects 324
allophane
  nuclear magnetic resonance (Si,Al) 342
amesite $Mg_2Al(SiAl)O_5(OH)_4$
  cf. kaolinite-serpentine group
amphibole group
  chemical etching 86
ankerite $Ca(Mg,Fe)(CO_3)_2$
  nuclear gamma ray resonance 108
argon Ar
  in cordierite

C

calcite $CaCO_3$
  stabilization of CO_3^{2-} by crystal field 307
calorimetry
  ilmenite-type $MgGeO_3$ 129
  $MnSiO_3$ polymorphs 317
carbon C
  diffusion in olivine 261
  diffusion in periclase 261
carbon dioxide CO_2
  in cordierite 233
carbonates
  ankerite 108
  nuclear gamma ray resonance 108
cassiterite SnO_2
  impurities 363
  interstitial Sn^{2+} 363
cation distribution
  cf. order-disorder
cation segregation
  olivenite-adamite 185
chalcedony SiO_2
  near-infrared spectrum 300
  water 300
chalcopyrite $CuFeS_2$
  growth of pyrite whiskers 223
channels
  cordierite 233
  gas contents 233
charge transfer spectra
  iron oxides 161
chemical bond
  Fe–O:MO 161
  hematite:MO 161
  maghemite:MO 161
chemical etching
  cf. etching
chlorite group
  clinochlore 370
  chlorite 347, 370
  far infrared spectra 347
  magnetic properties 370
  neutron diffraction 370
  thuringite 370
chrysotile $Mg_6Si_4O_{10}(OH)_8$
  cf. kaolinite-serpentine group
coesite SiO_2
  Raman spectrum 45
complex ions
  calcite 307
  fluorite 307
  stabilization by crystal field 307
  thorite 307
  zircon 307
cordierite $(Mg,Fe)_2Al_4Si_5O_{18}$
  gases in channels 233
  nuclear magnetic resonance 211, 217
  order-disorder 211, 217
crystal field stabilization
  complex ions 307
crystal growth
  pyrite whiskers 223
crystal structure
  cordierite, Ar,N_2,CO_2-bearing 233
  garnet, Mn^{3+}-bearing 279

D

dating
  thermoluminescence 122
decomposition
  in oxygen potential gradient 283
defects
  amphiboles 86
  cassiterite 363
  chemical etching 86, 90
  dislocations 39
  dissociated dislocations 39
  exoelectron spectroscopy 114
  K feldspar $KAlSi_3O_8$ 324
  phenakite 114
  pyroxene group 86
  quartz 114
  radiation damage 255
  surface 114
  titanite 255
deformation
  mechanisms 353
  pyrrhotite 353
diffuse streaks
  pigeonite 49
diffusion
  olivine (C) 261
  periclase (C) 261
disproportionation
  fayalite 283
  $MnSiO_3$ 317
dolomite $CaMg(CO_3)_2$
  electron microscopy 333
  modulated structures 333
domains
  albite 132
domain boundaries
  albite 132

E

eclogite
  coesite-bearing 45
  garnet-orthopyroxene intergrowth 29
  mineral chemistry 29
elastic instability
  domains in albite 132
elastic properties
  forsterite 201
  ilmenite-type $MgGeO_3$ 129
electric conductivity
  composition dependence 23
  olivine 23
  pressure effect 23
  silicate spinel 23
electron microscopy
  dolomite 333
  garnet-orthopyroxene intergrowth 29
  modulated structures 33
  orthopyroxene 29, 33
electron paramagnetic resonance (EPR)
  alkali feldspar 324
  forsterite:Cr,Al 291
  spodumene:Fe^{3+} 145
  superposition model 145
etching
  amphibole 86
  etchants 90
  pyroxene 86
eulite $(Fe,Mg)_2Si_2O_6$
  cf. orthopyroxene
exoelectron spectroscopy 114
exoemission 114

F

far infrared spectroscopy (FIR)
  phyllosilicates 347
ferromagnetic coupling
  biotite 141
Fizeau interferometry
  forsterite 201
fluorine F
  in melts 77
  in complex ions 307
fluorite CaF_2
  O_3^- complex 307

G

garnet group
  intergrowth with orthopyroxene 29
  Jahn-Teller distortion (Mn^{3+}) 279
  Mn^{3+}-bearing 279
  $MnSiO_3$ garnet 317
gehlenite $Ca_2Al_2SiO_7$
  cf. melilite
Grüneisen parameter
  forsterite 201

H

heat capacity
  ilmenite-type $MgGeO_3$
hematite Fe_2O_3
  charge transfer spectra 161
  chemical bonding 161
  formation from akaganeite 176
  ligand field spectra 161
  magnetic properties 161
  molecular orbitals 161
  nuclear gamma ray resonance 161
  optical spectra 161
high pressure
  $MnSiO_3$ polymorphs 317
  olivine 23
  phase transition 23, 317
  silicate spinel 23
high resolution transmission electron microscopy (HRTEM)
  cf. electron microscopy

hydrotalcite $(Mg_3Al(OH_8)_2CO_3 \cdot 2H_2O$
  infrared spectrum 34
  order-disorder 34
hyperfine interaction
  forsterite:Cr,Al 291
  iron hydroxides 311

I

ilmenite type
  compressibility 129
  $MgGeO_3$ 129
  thermal expansion 129
  thermodynamic properties 129
imogolite
  nuclear magnetic resonance (Si,Al) 342
indentation 39
infrared absorption (IR) spectra
  cf. also far infrared spectra
  adamite 185
  alkali feldspar 324
  chalcedony 300
  hydrotalcite 34
  O–H stretching 185
  olivenite 185
  opal c 300
  photothermal beam deflection 19
infrared reflection spectra
  marcasite 155
ionic charges
  effective, marcasite 155
iron
  coordination in melts 65

J

Jahn-Teller effect
  Mn^{3+} in garnet 279

K

kaolinite-serpentine group
  amesite 347
  chrysotile 347
  far infrared spectra 347
  greenalite 347
kinetics
  cation ordering olivine 1
  Si,Al ordering cordierite 211, 217

L

Landau theory
  ordering albite 93
lattice constants
  olivines 1
ligand field spectra
  iron oxides 161
luminescence
  forsterite (Mn^{2+}) 271

M

maghemite Fe_2O_3
  charge transfer spectra 161
  chemical bonding 161
  ligand-field spectra 161
  magnetic properties 161
  nuclear gamma ray resonance 161
  optical spectra 161
magnetic ordering
  biotite 370
  chlorite 370
  minnesotaite 370
  Monte Carlo simulation 370
magnetic properties
  akaganeite 176
  biotite 141, 370
  chlorite 370
  hematite 161
  iron hydroxides 311
  maghemite 161
  minnesotaite 9, 370
  wolframite 246
marcasite FeS_2
  infrared reflection spectra 155
  phonon modes, directional dependence 155
melilite $(Ca,Na)_2(Mg,Fe,Al)(Si,Al)_2O_7$
  nuclear gamma ray resonance 13
  synthesis 13
melts
  effect of oxygen fugacity 65, 191
  Fe-coordination 65, 191
  fluorine-bearing 77
  pressure-effect 191
  redox equilibria 191
  structure 65, 77, 191
mica group
  biotite 141
  far infrared spectra 347
  ferromagnetic coupling 141
  nuclear gamma ray resonance 141
minnesotaite $(Fe,Mg)_3Si_4O_{10}(OH)_2$
  ferromagnetism 9, 370
  neutron diffraction 9
  nuclear gamma ray resonance 9
  susceptibility 9
modulated structure
  dolomite 333
molecular orbital (MO) theory
  ferric iron 161, 311
  hematite 161
  iron hydroxides 311
  maghemite 161
  SCF-X_α-SW 161
Monte Carlo
  simulation of magnetization 370
montmorillonite group
  EXAFS 55
  far infrared spectra 347
  nontronite 55
  nuclear gamma ray resonance 55
  optical spectroscopy 55
  smectite 55, 357
  X-ray absorption 55
morphology
  pyrite 223
Mössbauer spectroscopy
  cf. nuclear gamma ray resonance (NGR)
multiple scattering X_α (MSX_α) calculation
  forsterite:Cr,Al 291

N

neutron diffraction
  chlorite 370
  greenalite 370
  minnesotaite 9, 370
nitrogen N_2
  in cordierite 233
nuclear gamma ray resonance (NGR)
  akaganeite 176
  ankerite 108
  biotite 141
  ^{57}Fe in melts 65
  ferromagnetic coupling 141
  hematite 161
  iron hydroxides 311
  maghemite 161
  melilites, Fe^{3+} 13
  minnesotaite 9
  montmorillonite group 55
  nontronite 55
  smectite 55
  wolframite 246
nuclear magnetic resonance (NMR)
  allophane:Si,Al 342
  cordierite:Si 211, 217
  imogolite:Si,Al 342
  nontronite 55
  smectite 55

O

olivenite group
  adamite 185
  cation segregation 185
  infrared spectra 185
  OH-stretching 185
  olivenite 185
olivine group
  cation distribution 1
  decomposition in oxygen potential gradient 283
  diffusion of carbon 261
  electric conductivity 23
  fayalite 23, 283
  forsterite 23, 201
  Grüneisen parameter 201
  kinetics cation ordering 1
  luminescence spectra Mn^{2+} 271
  spinel transition 23
  thermal expansion 201
  thermal properties 201
opal c $SiO_2 \cdot nH_2O$
  water 300
  near-infrared spectrum 300
optical absorption spectra
  alkali feldspar 324
  nontronite 55
  smectite 55
optical properties
  Ar,N_2,CO_2-bearing cordierite 233
order-disorder
  adamite 185
  albite 93, 99
  cordierite:Si,Al 211, 217
  hydrotalcite 34
  kinetics 1, 217
  olivenite 185
  olivine 1
orthopyroxene $(Mg,Fe)_2Si_2O_6$
  cf. pyroxene group
  dislocations 39
  electron diffraction 29
  electron microscopy 39
  eulite 39
  indentation 39
  intergrowth with garnet 29
oscillator parameter
  marcasite 155
oscillator strength
  Sn^{2+} in cassiterite 363
oxygen potential gradient 283

P

periclase MgO
  diffusion of carbon 261
phase transition
  akaganeite-hematite 176
  albite 93, 99
  Co_3O_4-spin unpairing 149
  $MnSiO_3$ 317
  olivine-spinel 23
  pigeonite 49
phenakite Be_2SiO_4
  defects 114
  exoemission 144
photoacoustics 19
photothermal beam deflection spectroscopy 19
pigeonite $(Ca,Mg,Fe)_2Si_2O_6$
  diffuse streaks 49
  subsolidus reactions 49
pyrite FeS_2
  morphology 223
  whisker growth 223
pyrophyllite $Al_2Si_4O_{10}(OH)_2$
  far infrared spectra 347
pyroxene group
  augite exsolution from pigeonite 49
  chemical etching 86
  clinopyroxenes 49
  defects 145
  exsolution 49
  $MnSiO_3$ 317
  orthopyroxene 49
  phase transformation 49, 317
  pigeonite 49
  spodumene 145
  subsolidus 49
pyroxenoid group
  calorimetry 317
  pyroxmangite 317
  rhodonite 317
  transformation to pyroxene 317
pyrrhotite $Fe_{1-x}S$
  deformation mechanism 353
  prism slip, basal slip 353

Q

quartz
  coesite aggregates 45
  defects 114
  exoemission 114
  thermoluminescence 122

R

Raman microprobe 45
Raman spectra
  coesite 45
  Fe-bearing melts 191
  fluorine-bearing melts 77
rhodonite $(Mn,Ca)SiO_3$
  calorimetry 317

S

self consistent field X_α scattered wave (SCF-X_α-SW) MO calculations
  Fe-O clusters 161, 311
  Fe-OH clusters 311
slip-systems
  pyrrhotite 353
Sn^{2+}
  absorption bands 363
  interstitial in cassiterite 363
  oscillator strength 363
  reflection spectrum 363
spin transfer
  forsterite:Cr,Al 291
spin unpairing
  Co_3O_4 149
spinel group
  Co_3O_4 149
  electric conductivity 23
  $(Mg,Fe)_2SiO_4$ 23
  phase transition 23, 149
  silicate spinels 23
  thermodynamic properties 149
spodumene $LiAlSi_2O_6$
  electron paramagnetic resonance 145
  local distortions 145
stabilization
  complex ions by crystal field 307
strain
  domain boundary albite 132
